>>innovate

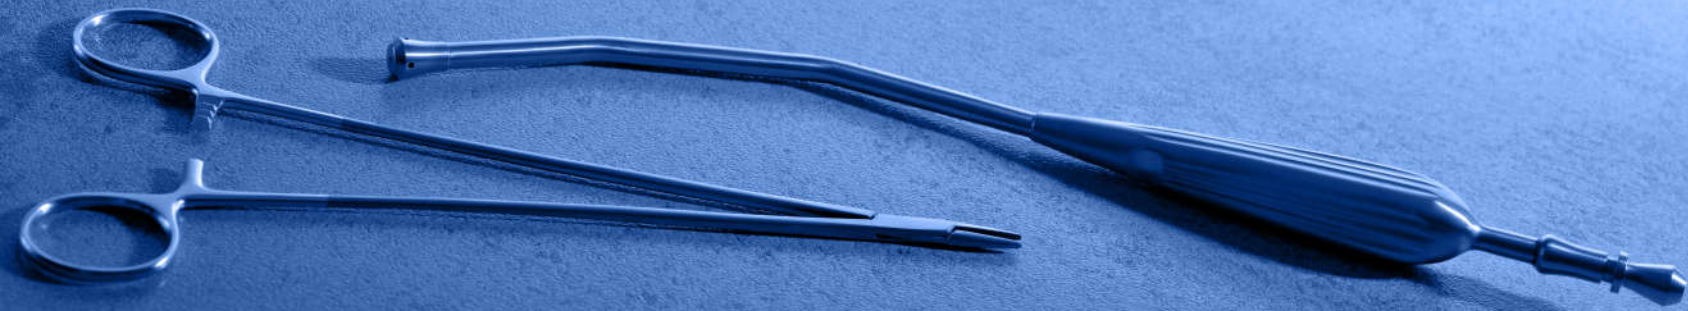

Materials

We manufacture all our products from martensitic stainless steel types (AISI 410, 420, 440) which are the highest quality medical stainless steel available.

Our produced instruments can be autoclaved and reprocessed for many times while attaining same level of quality in performance and surface of the instruments, since we do have a strict quality checks on materials used before processing.

We intend to provide highest quality instruments and ensure that qualified materials have been used while manufacturing and are not harmful for patients.

your health is our
>> priority

Quality Standards

The word “quality” is the most important factor to consider for everyone, therefore to ensure the highest quality of our products we have a consistent quality control system in our company. Surgimax have accredited ISO 9001:2015 and ISO 13485:2016, our products also carry CE mark as well which guarantees that each instrument manufactured at Surgimax is of our total quality, bear ultimate perfection and reliability.

Surgimax Guarantee

Surgimax made instruments are being used by medical professionals all over the world from more than three decades who have tested our instruments in practical and found them up to their required quality standards.

As a commitment to above we have implemented QMS system at our facility to give highest attention towards each instrument during manufacturing to keep its functionality as accurate as surgeon hands so that it could perform precisely during operation.

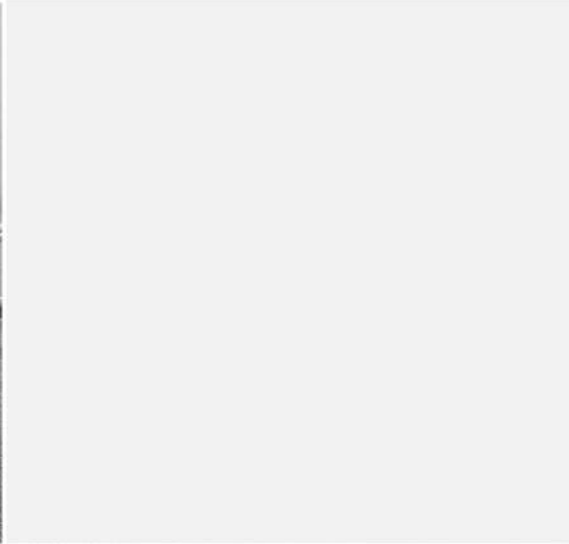

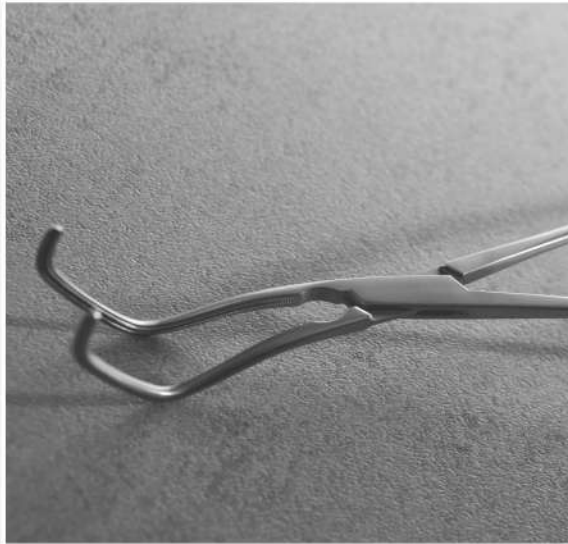

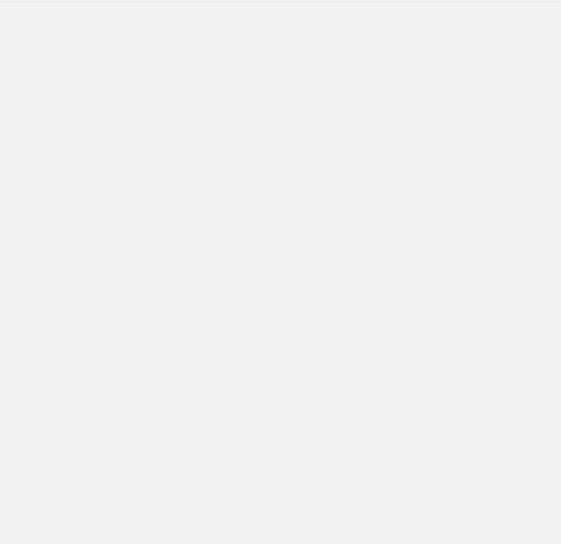

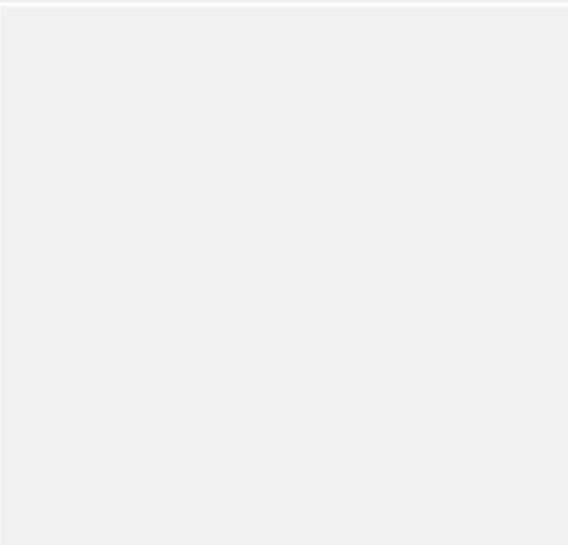

Within the scope of guarantee we take responsibility to repair or replace our products if found with crack, deform, bend, corrode or fail during usage, whereas in case of unlikely event we do not require any proof of purchase, the Surgimax brand on instruments will act as our guarantee.

Competence

In order to be competent company for our customers we keep updating our structure in terms of machinery used, hiring more technical employees, bringing new products and positive changes in product designs and production techniques.

Our competence is the use of state-of-the-art precision machines in our production line, experienced workers and centralized manufacturing system which is working like a backbone. That is the thing which encourages Surgimax to compete on better place as compared to our competitors because we do have better control over product design, consistency in quality and competitive pricing policy.
